

Quality Control Inspection Report

Product Name: Precision Gear Housing

Batch Number: GH-20240612-01

Inspection Date/Time: 2024-06-12 / 10:30 AM

Inspector Name: Alex Martinez

Quantity Inspected: 50 units

Sampling Plan Used: ANSI/ASQC Z1.4, Single Sampling Plan, Level II

Quality Parameters

Parameter	Specification	Actual Measurement	Pass/Fail
Dimensions (mm)	100 +/- 0.5	99.5	Pass
Surface Finish	Smooth	Rough patch	Fail
Weight (g)	250 +/- 5	252	Pass
Color Uniformity	Consistent Grey	Consistent Grey	Pass
Hole Diameter (mm)	10 +/- 0.2	10.1	Pass
Thread Integrity	No burrs, clean	Minor burrs	Fail
Labeling	Clear, legible	Clear, legible	Pass

Total Number of Defects Found: 2

Acceptable Quality Limit (AQL) Percentage: 955%

Batch Status: [X] Pass [] Fail

Corrective Actions Recommended

- Rework units with rough surface patches to meet smoothness specification.
- Remove burrs from threads and implement additional inspection at the threading station.
- Review surface finishing process for potential improvements.

Final Inspection Decision:

Batch accepted with minor rework required. Proceed to packaging after corrective actions.
